Milano, October 19, 2026

Signori Andrea, PhD

Non-tenure track Assistant Professor - RTDa,
Alexander von Humboldt Research Fellow,
Department of Mathematics of the Politecnico di Milano
Via E. Bonardi 9, 20133 Milano, Italy
Born 18-01-1993, Bergamo (BG), Italy
Email: andrea.signori@polimi.it
Website: `https://signori.faculty.polimi.it/`
ORCID: 0000-0001-7025-977X
Scopus: 466 citations, h-index 14
Google Scholar: 727 citations, h-index 18, i10-index 27

Education and Work Experience

- 05-06-2023/05-06-2034: Italian National Abilitation - Associate Professor
  Abilitazione Scientifica Nazionale: seconda fascia Settore Concorsuale 01/A3: Analisi matematica, Probabilità e Statistica matematica
- 04-07-2022/Now: Non-tenure track Assistant Professor RTDa, at the Department of Mathematics of the Politecnico di Milano (Italy)
- 2022/Now, *Humboldt Research Fellow*
- 01-03-2021/04-07-2022: PostDoc position at the Department of Mathematics "F. Casorati", University of Pavia (Italy)
- 11-12-2020: Ph.D. Defense: PhD student in mathematical analysis: Joint PhD Program in Mathematics Pavia–Milano-Bicocca–INdAM, University of Pavia. Title of the Thesis: "*Understanding the Evolution of Tumours, a Phase-field Approach: Analytic Results and Optimal Control*" (supervisor: Prof. Pierluigi Colli)
- 01-10-2017/11-12-2020: PhD student in analysis: Joint PhD Program in Mathematics Pavia–Milano-Bicocca–INdAM
- 19-09-2017: Master degree in mathematics, University of Pavia. Title of the thesis: "*Boundary control problem and optimality conditions for the Cahn–Hilliard equation with dynamic boundary conditions*" (supervisor: Prof. Pierluigi Colli), 110/110 cum Laude
- 21-09-2015: Bachelor's degree in mathematics, University of Pavia. Title of the thesis: "*The Legendre–Fenchel transform*" (supervisor: Prof. Enrico Vitali)

Grants

- Member of the GNAMPA-INdAM Project 2026 (2500,00€), Principal investigator Andrea Giorgini: *Analisi di modelli di Cahn-Hilliard per la separazione di fase*
- Recipient of an INdAM Visiting Professor Grant (400,00€) for hosting Dr. Patrik Knopf at the Politecnico di Milano.
- Since 2024, Member of the *European Mathematical Society Topical Activity Group – Mixtures*, Webmaster
- Principal investigator of the GNAMPA-INdAM Project 2025 (3500,00€): *Analisi di Interfacce in Movimento: Applicazioni alla Diffusione Tumorale e Miscelazione di Fluidi*

- Member of the GNAMPA-INdAM Project 2024 (4000,00€), Principal investigator Abramo Agosti: *Analisi di modelli di campo di fase con applicazioni alla Biomedicina*
- 2022, Awarded of the *Humboldt Research Fellowship* for postdoctoral researcher
- Recipient of the *Kovalevskaya Scholarship* for the attendance of the International Congress of Mathematics 2022 in Saint Petersburg
- Member of PRIN 2020: *PRIN Project Mathematics for industry 4.0 (Math4I4)* (PI: Prof. P. Ciarletta)
- Principal investigator of the GNAMPA-INdAM Project 2020 (2925,00€): *Analisi e Controllo di Modelli ad Interfaccia Diffusa in Fisica e in Biologia*
- 2019: LIA-COPDESC Travel Grant (1000,00€)
- Member of PRIN 2017: *Mathematics of active materials: From mechanobiology to smart devices* (PI: Prof. L. Preziosi)

Publications

Articles under review

(1) P. Colli, G. Gilardi, A. Signori and J. Sprekels, On Brinkman flows with curvature-induced phase separation in binary mixtures. Preprint arXiv:2509.20282 [math.AP], (2025), 1-29.

(2) T. Lorenzi, G. Pozzi and A. Signori, On a phenotype-structured phase-field model of nutrient-limited tumour growth. Preprint arXiv:2507.03467 [math.AP], (2025), 1-25.

Organizing experience

- 11-11-2026/13-11-2026 Mathematics for our Health Workshop (M4H Second Edition), Politecnico di Milano, (Milano, Italy)
- 06-07-2026/10-07-2026 The 15th AIMS Conference, Organizer of the SS87: Mathematical Insights into Phase-Field Models, Kapodistrian University of Athens (Athens, Greece)
- 16-12-2024/20-12-2024 The 14th AIMS Conference, Organizer of the SS54: Nonlocal dynamics and complex patterns in phase-separation, NYU Abu Dhabi (Abu Dhabi, United Arab Emirates)
- 07-11-2024/08-11-2024 Mathematics for our Health (M4H) Workshop, Politecnico di Milano, (Milano, Italy)
- 22-02-2024 BIO-Med Workshop: Cahn–Hilliard and Allen–Cahn Equations in Bio-medicine (Politecnico di Milano, Italy)

Teaching Experiences

Politecnico di Milano:

- 2026–2027: "Mathematics", degree course in Biomedical Engineering (MEDTEC Program)
- 2025–2026: "Mathematics", degree course in Biomedical Engineering (MEDTEC Program)
- 2024–2025: "Mathematics", degree course in Biomedical Engineering (MEDTEC Program)
- 2023–2024: "Mathematics", degree course in Biomedical Engineering (MEDTEC Program)
- 2022–2023: "Calculus 2", degree course in civil Engineering
- 2022–2023: Adjunct Professor for "Mathematics with elements of Statistic", **48** hours, degree course in Pharmacy (University of Pavia)
- 2022–2023: Exercise lectures: Mathematical and Numerical Methods in Engineering, Master Degree Program in Biomedical Engineering

University of Pavia:

- 2021–2022: Adjunct Professor for "Mathematics with elements of Statistic", **24** hours, degree course in Pharmacy
- 2020–2021: Exercise lectures "Calculus 2", **4** hours, degree course in Engineering
- 2020–2021: Exercise lectures "Elements of Mathematics and statistic", **12** hours, degree course in Science, technology and environment
- 2020–2021: Seminar lectures "Precorsi", **20** hours, degree course in Engineering
- 2019–2020: Exercise lectures "Advanced Calculus and Statistic", **7** hours, degree course in Engineering
- 2018–2019: Project "Lauree PLS: Il gioco e il Caso", **30** hours
- 2018–2019: Exercise lectures "Calculus 2", **10** hours, degree course in Physics
- 2018–2019: Exercise lectures "Calculus 1", **10** hours, degree course in Engineering
- 2018–2019: Exercise lectures "Elements of Mathematics and statistic", **14** hours, degree course in Science, technology and environment
- 2018–2019: Exercise lectures "Mathematics and statistic", **6** hours, degree course in Biotechnology
- 2017–2018: Exercise lectures "Mathematics", **20** hours, degree course in Biotechnology
- 2017–2018: Exercise lectures "Mathematics", **15** hours, degree course in Biotechnology
- 2016–2017: Exercise lectures "Calculus 2", **28** hours, degree course in Engineering
- 2015–2016: Exercise lectures "Mathematics", **20** hours, degree course in Biotechnology

Invited talks at workshops or conferences

- 08-07-2026 The 15th AIMS Conference, SS85: Phase-field models and their singular limits, "Active Phase Separation and Self-Organizing Droplets", Kapodistrian University of Athens, Athens, Greece.
- 07-07-2026 The 15th AIMS Conference, SS3: Analysis of diffuse and sharp interface models, "Velocity control in Navier-Stokes-Cahn-Hilliard models with curvature effects", Kapodistrian University of Athens, Athens, Greece.
- 25-06-2026 MAPLES2026: Mathematical Analysis of PDEs in Life and Engineering Sciences, "Velocity control in curvature-driven Navier–Stokes–Cahn–Hilliard membrane dynamics", University of Pavia, Pavia, Italy.
- 16-06-2026 Fudan University Seminar, "A sixth-order Cahn–Hilliard model for biological membranes with hydrodynamic coupling", School of Mathematical Sciences, Fudan University, Shanghai, China.

- 10-06-2026 Fudan University Seminar, "Active Droplets: Mathematical Approaches to Active Phase Separation", School of Mathematical Sciences, Fudan University, Shanghai, China.
- 06-06-2026 Hangzhou Normal University Seminar, "Active Droplets: Mathematical Approaches to Active Phase Separation", Hangzhou Normal University, Hangzhou, China.
- 30-04-2026 Oberseminar IntComSin, "A sixth-order Cahn–Hilliard model for biological membranes with hydrodynamic coupling", Regensburg University, Regensburg, Germany.
- 09-03-2026 Mathematical Fluid Mechanics and Related Topics, "Navier–Stokes–Cahn–Hilliard modelling of biological membranes with curvature effects", Regensburg University, Regensburg, Germany.
- 10-12-2025 Free boundaries and growth, "Active Phase Separation: A Mathematical Perspective on Droplet Dynamics", Erwin Schrödinger International Institute for Mathematical Physics, Vienna, Austria.
- 19-11-2025 Analysis Seminar, (Journal Club), "Modeling active phase separation: dynamics and stability of droplets", Politecnico di Torino, Torino, Italy.
- 14-05-2025 Berliner Oberseminar Nichtlineare partielle Differentialgleichungen (Langenbach-Seminar), "Mathematical models of active phase separation and droplet dynamics", Weierstrass Institute (WIAS), Berlin, Germany.
- 25-04-2025 GRK 2339 IntComSin Kolloquium: "Non-Equilibrium Droplets: Mathematical Approaches to Active Phase Separation", University of Regensburg, Germany.
- 02-04-2025 PDE Afternoon University of Wien, "Active Phase Separation: A Mathematical Perspective on Droplet Dynamics", University of Wien, Vienna, Austria.
- 06-02-2025 EMS Topical Activity Group (TAG) on Mixtures:Mixtures: Modeling, Analysis and Computing, "Dynamics of active droplet formation in reaction-driven Cahn–Hilliard models", Charles University, Prague, Czech Republic.
- 18-12-2024 The 14th AIMS Conference, SS24: Optimal control and parameter estimation in biological models, "Optimal control of Cahn–Hilliard–Keller–Segel tumor growth models", NYU Abu Dhabi, Abu Dhabi, United Arab Emirates.
- 18-12-2024 The 14th AIMS Conference, SS10: Analysis of diffuse and sharp interface models, "Active droplet formation in Cahn–Hilliard models with chemical reactions", NYU Abu Dhabi, Abu Dhabi, United Arab Emirates.
- 10-09-2024 Italian-Japanese Workshop on Variational Perspectives for PDEs, "Analysis and optimal control of Keller–Segel–Cahn–Hilliard models for tumor growth", Pavia, Italy.
- 11-07-2024 C.I.M.E. Diffuse Interface methods in Continuum Mechanics: analysis, singular limits and algorithms, "Triggering phase dynamics starting from a pure phase", Cetraro, Italy.
- 10-06-2024 From Cells to Tissues: Models, Analysis and Applications: "Exploring RNA-Protein Dynamics through Phase Segregation", Como, Italy.
- 24-05-2024 GRK 2339 IntComSin Kolloquium: "Initiating Phase Separation: Reaction-Driven Solutions in Cahn–Hilliard Equations", University of Regensburg, Germany.
- 04-03-2024 Dynamics of interfaces: From applied math to physics and material science: "Exploring RNA-Protein Dynamics through Phase Segregation", University of Augsburg, Augsburg, Germany.
- 05-09-2023 XXII Congresso dell'Unione Matematica Italiana: "Chemotaxis model for tumour growth", Pisa, Italy.
- 02-06-2023 The 13th AIMS Conference on Dynamical Systems, Differential Equations and Applications: "Phase Segregation Drives RNA-Protein Dynamics", University of Wilmington, Wilmington, NC, USA.
- 15-12-2022 *Department seminar series*: "Chemotaxis model for tumour growth", Politecnico di Milano.
- 12-10-2022 MOCETIBI kick-off workshop: "Liquid Droplets in Cell Biology: RNA-Protein model", Sorbonne Université, Paris.

- 23-06-2022 Lake Como School of Advanced Studies: Mathematical models for bio-medical sciences: "Phase segregation in Cell Biology: RNA-Protein model", Como.
- 24-05-2022 INdAM Workshop PHAME2022 - PHAse field MEthods in applied sciences: "Cell's organisation: RNA-Protein dynamics, Rome.
- 30-09-2021 DMV-ÖMG Annual Conference 2021, Joint Annual Conference of the German Mathematical Society DMV and the Austrian Mathematical Society ÖMG, Passau (online): "Mechanical model for tumour growth: mathematical analysis and optimal therapies".
- 13-04-2021 *Seminari di Matematica Applicata*: "Mechanical model for tumour growth: mathematical analysis and optimal therapies", University of Pavia.
- 25-11-2020 *Se mi narri di Matematica*: "Mathematical Perspectives on Tumour Growth: From Well-posedness to Optimal Control", University of Pavia.
- 06-02-2020 *Insalate di matematica*: "Mathematical modeling of cancer: challenges and perspectives towards a tailored therapy", University of Milano-Bicocca.
- 28-11-2019 IntComSin Seminar: "On a phase field model of Cahn–Hilliard type for tumor model with elasticity", Regensburg University.
- 19-11-2019 IntComSin Seminar: "Optimal control theory for parabolic equations: introduction and applications", Regensburg University.
- 02-10-2019 Annual Meeting GRK IntComSin: Interfaces, Complex Structures, and Singular Limits (monastery Weltenburg, Kelheim, Germany): "Optimal control problems with applications to tumor growth models".

Conferences and Workshops

- 06-07-2026/10-07-2026 The 15th AIMS Conference, National and Kapodistrian University of Athens (Athens, Greece)
- 22-06-2026/25-06-2026 MAPLES2026: Mathematical Analysis of PDEs in Life and Engineering Sciences, University of Pavia (Pavia, Italy)
- 09-03-2026/13-03-2026 Mathematical Fluid Mechanics and Related Topics, Regensburg University (Regensburg, Germany)
- 09-12-2025/12-12-2025 Free boundaries and growth, Erwin Schrödinger International Institute for Mathematical Physics (Vienna, Austria)
- 13-11-2025 Incontro scientifico UMI, Pavia (Pavia, Italy)
- 24-10-2025 One Day on Variational Problems on the occasion of Franco Tomarelli's 70 birthday, Politecnico di Milano (Milano, Italy)
- 12-03-2025/14-03-2025 Aachen–Erlangen–Regensburg Young Mathematicians Meeting: From Theory to Applications, Regensburg University (Regensburg, Germany)
- 05-02-2025/07-02-2025 EMS Topical Activity Group (TAG) on Mixtures - Mixtures: Modeling, Analysis and Computing, Charles University (Prague, Czech Republic)
- 08-01-2025/10-01-2025 Fluids@PoliMi, Politecnico di Milano (Milano, Italy)
- 16-12-2024/20-12-2024 The 14th AIMS Conference, NYU Abu Dhabi (Abu Dhabi, United Arab Emirates)
- 13-11-2024/15-11-2024 PDE Festival@UniMi, Università degli studi di Milano (Milano, Italy)
- 07-11-2024/08-11-2024 Mathematics for our Health (M4H) Workshop, Politecnico di Milano (Milano, Italy)

- 20-06-2022/24-06-2022 Lake Como School of Advanced Studies: Mathematical models for bio-medical sciences (Como, Italy)
- 23-05-2022/27-05-2022 INdAM Workshop PHAME2022 - PHAse field MEthods in applied sciences (Rome, Italy)
- 28-03-2022/01-04-2022 Mathematical Modeling of Organization in Living Matter, CIRM-IHP PROGRAM (Marseille, France)
- 01-10-2021 One day in PDEs in honor of Sandro Salsa, Politecnico di Milano
- 27-09-2021/01-10-2021 DMV-ÖMG Annual Conference 2021, Joint Annual Conference of the German Mathematical Society DMV and the Austrian Mathematical Society ÖMG, Passau (online)
- 13-09-2021/17-09-2021 15th International Conference on Free Boundary Problems: Theory and Applications 2021, Berlin (online)
- 23-08-2021/27-08-2021 Summer school: Fluids under Control (Prague, Czech Republic)
- 12-04-2021/16-04-2021 CISM Advanced Course: Optimization of Shape and Material Properties: Advanced Mathematical Methods and 3D Printing (online)
- 14-02-2021/20-02-2021 Oberwolfach: Challenges in Optimization with Complex PDE-Systems (online)
- 05-02-2021 Erlangen-Regensburg-Vienna Colloquium on Nonlinear PDEs (online)
- 22-11-2019 Workshop on Numerical Analysis and Scientific Computing (FAU Erlangen, Germany)
- 08-11-2019 GRK 2339 IntComSin Kolloquium (Regensburg, Germany)
- 25-10-2019 GRK 2339 IntComSin Kolloquium (Erlangen, Germany)
- 30-09-2019/02-10-2019 Annual Meeting GRK IntComSin: Interfaces, Complex Structures, and Singular Limits (kloster Weltenburg, Regensburg, Germany)

- 02-09-2019/07-09-2019 XXI Congresso dell'Unione Matematica Italiana (UMI) (Pavia)
- 01-07-2019/05-07-2019 Summer School on PDEs from theory to applications (Milano, Univ. Milano Statale)
- 08-05-2019/10-05-2019 Recent advances in Phase-Field modeling: from Engineering to Biology (Pavia)
- 25-03-2019/28-03-2019 Calculus of Variation and Nonlinear Partial Differential Equations (Regensburg)
- 21-02-2019 Decima Giornata di Studio Università di Pavia - Politecnico di Milano: Equazioni Differenziali e Calcolo delle Variazioni (Milano)
- 19-09-2018/21-09-2018 Optimal Control and Mean Field Games (Pavia)
- 18-06-2018/22-06-2018 Special Materials and Complex Systems (Gargnano)
- 22-05-2017/25-05-2017 Frontiers in Partial Differential Equations Analysis and Solvers (Pavia)

Visiting periods

- School of Mathematical Sciences, Fudan University, Shanghai, China, guest of Prof. Hao Wu: 03-06-2026/19-06-2026
- School of Hangzhou Normal University, Hangzhou, China, guest of Prof. Jingning He: 05-06-2026/06-06-2026
- University of Regensburg, Humboldt fellowship Program, guest of Prof. Harald Garcke: 01-03-2026/31-05-2026
- University of Vienna, Austria, guest of Prof. Ulisse Stefanelli: 03-12-2025/09-12-2025
- Politecnico di Torino, DISMA, guest of Prof. Tommaso Lorenzi: 18-11-2025/21-11-2025
- Weierstrass Institute (WIAS), Berlin, guest of Prof. Matthias Liero: 12-05-2025/16-05-2025
- University of Vienna, Austria, guest of Prof. Ulisse Stefanelli: 31-03-2025/04-04-2025
- University of Regensburg, Humboldt fellowship Program, guest of Prof. Harald Garcke: 01-03-2025/31-05-2025
- University of Regensburg, Humboldt fellowship Program, guest of Prof. Harald Garcke: 01-03-2024/31-05-2024
- University of Regensburg, guest of Prof. Harald Garcke: 06-06-2022/16-06-2022
- University of Regensburg, guest of Prof. Harald Garcke: 15-09-2019/15-12-2019

Supervision and mentoring

16/07/2024: Luca Melzi, Master thesis in Mathematical Engineering at the Politecnico di Milano: *A non-local phase-field model for tumor growth*, 110 cum laude. Currently PhD student at Imperial College, London.

Languages

- Italian (mothertongue)
- English (fluent)
- Chinese (intermediate $\sim$ 汉语水平4)

Referee Activities

- Evolution Equations & Control Theory (*Evol. Eq. Control Th.*)
